VAL4

Fourth International Conference on Material and Component Performance under Variable Amplitude Loading

Editors: *M. Decker, R. Heim, C. M. Sonsino*

Planned from 30 March to 01 April 2020 in Darmstadt, Germany, VAL4 didn't take place due to unforeseen circumstances in connection with the worldwide new Coronavirus outbreak (COVID-19) in springtime 2020.

VAL4

**Fourth International Conference on
Material and Component Performance
under Variable Amplitude Loading**

Planned from 30 March to 01 April 2020 in Darmstadt, Germany, VAL4 didn't take place due to unforeseen circumstances in connection with the worldwide new Coronavirus outbreak (COVID-19) in springtime 2020.

Executive Chairs: *M. Decker*, AUDI AG, Ingolstadt, DE
R. Heim, Fraunhofer LBF, Darmstadt, DE
C. M. Sonsino, Fraunhofer LBF, Darmstadt, DE

ISBN 978-3-9820591-0-5

Content

	Page
Plenary Lectures	1
Vibration Fatigue – lifetime of systems subject to shocks and vibration (#96) <i>M. DECKER</i>	3
New Data Sources and Data Analytics Methods for Durability Engineering (#98) <i>M. BURGER, K. DRESSLER, M. SPECKERT</i>	19
Fatigue of Engineered Metallic Materials under Constant- and Variable-Amplitude Loading (#12) <i>J. C. NEWMAN, JR.</i>	33
Covering the Effect of Loading Modes and Their Sequence in Numerical Simulation of Variable Amplitude Durability (#101) <i>J. PAPUGA, M. RŮŽIČKA, M. NESLÁDEK</i>	49
Variable amplitude multiaxial fatigue behavior of Additive Manufactured Metals (#95) <i>R. MOLAEI, A. FATEMI</i>	65
A - Vibration fatigue	79
Vibration fatigue at impact excitation: time vs frequency domain (#19) <i>P. OGRINEC, J. SLAVIČ, M. ČESNIK, M. BOLTEŽAR</i>	81
Using The Experimental Data In Form Of Gasser Curve To Compare The Methods For Longevity Estimation (#30) <i>I. V. GADOLINA, A. V. ERPALOV</i>	83
The role of uncertainty of power spectral density data in estimating the fatigue damage of random uniaxial loadings through frequency-domain methods (#38) <i>D. BENASCIUTTI</i>	91
Fatigue damage assessment model in frequency domain for non-Gaussian strain energy density parameter (#37) <i>M. BÖHM, D. BENASCIUTTI</i>	101
B - Welding and Riveting	111
Linear damage accumulation of self-pierce riveted joints (#107) <i>L. MASENDORF, M. WÄCHTER, A. ESDERTS, M. OTROSHI, G. MESCHUT</i>	113
Application of an Integral Treatment of Butt Joints for the Fatigue Life Assessment under Variable Amplitude Loading (#68) <i>B. MÖLLER</i>	123

Analysis of the notch effect components of weld joint (#85) <i>V. CHMELKO, M. HARA KAL', P. ŽLÁBEK</i>	125
Extremely low cycle fatigue assessment model for structural steel and its application to welded joints (#122) <i>T. HANJI, K. TATEISHI</i>	131
C – Load Spectra (1)	141
Assessment of non-stationary random vibration loading (#27) <i>A. TRAPP, P. WOLFSTEINER</i>	143
A review on the methods for modelling loading spectra and their scatter (#34) <i>M. NAGODE, J. KLEMENC</i>	155
Impact of the kurtosis parameter of the load on the fatigue life of a structure (#66) <i>A. NIEŚŁONY, M. BÖHM, R. OWSIŃSKI</i>	165
Extrapolation of load spectra using Kernel Density Estimators (#108) <i>V. SCHRÖDER, C. MÜLLER, A. ESDERTS</i>	175
E – Load Spectra (2)	185
Derivation and categorization of road quality in view of operation loads to consider customer requirements for customer-focused sales (#119) <i>M. STÄDELE, B. MUNDL, A. RUPP, R. GROSSKOPF, M. STREICHER</i>	187
Fatigue load spectra: model and identification proposals for the automotive (#120) <i>M. L. FACCHINETTI, C. DOUDARD, E. BELLLEC, M. PAZ SILVESTRI</i>	201
Decomposition of non-stationary random vibration loading into Gaussian portions using the trispectrum (#53) <i>A. TRAPP, P. WOLFSTEINER</i>	211
Drivers influence on wheel load spectra (#110) <i>S. MA, J. KÄSGEN, R. HEIM</i>	223
D - Commercial Vehicles & Transport	233
The influence of stiffness and road profile on stress proportionality of axle trailers (#84) <i>V. CHMELKO, E. SCHÄFER, M. MARGETIN</i>	235
Load assumption for structural components of agricultural machines (#106) <i>S. STELLMACH, L. BRAUN, M. WÄCHTER, A. ESDERTS, S. DIEKHAUS</i>	241

Review of experience from development of buses: service stresses, laboratory fatigue tests and fatigue life calculations (#71) <i>M. KEPKA, M. KEPKA JR.</i>	251
Load Spectra for the Design of Railway Car-Bodies (#77) <i>R. RENNERT</i>	261
F - Fatigue Assessment	271
Definition of simplified fatigue tests using numerical fatigue simulation methods (#14) <i>R. SCHRANK</i>	273
Fatigue assessment of cast iron components under variable amplitude loading considering overloads (#31) <i>J. HESSELER, C. BLEICHER, J. BAUMGARTNER</i>	283
Response of the structural materials to fatigue loads at bending block load with an mean value (#32) <i>R. PAWLICZEK</i>	291
Simulation studies on the influence of cyclic stress-strain curve parameters on the degree of fatigue failure of material under block load conditions with the mean value (#33) <i>T. ŁAGODA, R. PAWLICZEK</i>	301
G - Fracture Mechanics	311
The U-Concept: A simple add-on to the Local Strain Approach for the fracture fatigue life calculation of structures under constant and variable amplitude loading (#42) <i>M. FIEDLER, M. VORMWALD</i>	313
Concepts for crack propagation under variable mechanical and thermal loadings based on the effective cyclic J-Integral (#48) <i>A. BOSCH, M. VORMWALD</i>	323
Fatigue crack growth in the structural elements of the RRJ-95 aircraft under bench testing and service conditions (#52) <i>A. A. SHANYAVSKIY, A. P. SOLDATENKOV, A. A. TOUSHENTSOV</i>	333
H - Welding	343
Fatigue assessment of welded gear components under variable amplitude loading and multiaxial loading conditions (#10) <i>R. WATERKOTTE, J. BAUMGARTNER, J. HESSELER</i>	345
Fatigue Simulation of Welds Using the 'Total Life' Method (#72) <i>A. HALFPENNY, S. VERVOORT, P. ROBERTS</i>	353

Damage Assessment In A Welded Tubular Joint Under Random Loading (#86) <i>C. RONCHEI, S. VANTADORI, A. CARPINTERI, F. GIORDANI, G. GIORDANI, I. ITURRIOZ, R. I. RODRIGUES, S. DANIELA, A. ZANICHELLI</i>	363
Comparison of Different Assessment Methods of Weld Seams Applied to Automotive Suspension Components (#117) <i>H. DANNBAUER, K. HOFWIMMER, W. HÜBSCH</i>	373
I - Integrity Concepts	375
Structural health monitoring for damage detection and fatigue life estimation: a frequency-domain approach (#87) <i>D. MARQUES, D. VANDEPITTE, V. TITA</i>	377
Estimation of Road Roughness Based on Vehicle Measurements (#90) <i>M. BURGER, M. SPECKERT, K. DRESSLER</i>	387
A metro rail axle multi-level integrity concept combining safe life and damage tolerance approach (#113) <i>R. HEIM, K. LIEDGENS</i>	389
Fatigue Life Estimation under Variable Amplitude Loading including a Consideration of Size Effects (#104) <i>M. HELL, R. WAGENER, T. MELZ</i>	403
J - Multiaxial Loading (1)	405
Operating loads on Electrically Power Assisted Cycles (EPAC) (#121) <i>E. GROSS</i>	407
New modern materials in design for high speed freight wagon bogies and their components: laboratory tests and track measurements (#137) <i>J. CHVOJAN, J. VACLAVIK</i>	423
A transient method for nonproportionality under random loading conditions (#47) <i>X. SUN, S. SHI, X. CHEN</i>	433
N - Multiaxial Loading (2)	435
Multiaxial block programs: A new method for the efficient testing of the durability of elastomeric bearings (#57) <i>T. THÜRINGER, K. BÜTTNER, G. PROKOP</i>	437
New modelling method with the focus on high dynamic loads, hydraulic damping and multi-axial excitation for use in load data determination using multi-body simulation (#63) <i>S. ERNST, K. BÜTTNER, G. PROKOP</i>	447

Development of models for life estimation for LSI exhaust manifolds (#75)	457
<i>M. WENDT, W. REHM</i>	
Life dependent material parameters applied to lifetime calculation under multiaxial variable-amplitude loading (#83)	473
<i>A. KAROLCZUK, J. PAPUGA, K. KLUGER</i>	
K - Influences on Fatigue	475
Behavior of magnesium alloy AZ31 under variable thermomechanical conditions (#18)	477
<i>D. ŠERUGA, T. BEŠTER, M. NAGODE, J. KLEMENC</i>	
Cut edge influence on the fatigue behavior of sheet metals under con- stant and variable amplitude loading (#54)	487
<i>M. THUM, P. HAEFELE</i>	
Evaluation of Spectrum Loaded Components by the Damage Equivalent Method of Required Fatigue Strength (RFS) through the Example of Passenger Car Wheels (#114)	497
<i>C. M. SONSINO, M. BREITENBERGER, S. SCHRÖDER, K. JÜRGENS</i>	
Modelling load history effects on steel fatigue properties using self- heating measurements (#129)	511
<i>J. LOUGE, S. MOYNE, S. CALLOCH, C. DOUDARD, B. WEBER, B. LEVIEIL</i>	
L - Probabilistic and Energy Based Methods	521
Energy based model for fatigue damage cumulation in materials under random loading (#40)	523
<i>T. ŁAGODA, M. KUREK</i>	
A strain energy density approach to fatigue crack growth under spectrum block loading (#123)	533
<i>E. AMSTERDAM</i>	
PhyBaL _{SL} – short-time procedure for the determination of the fatigue life- time of metallic materials (#11)	535
<i>B. BLINN, T. BECK, B. JOST, M. KLEIN, D. EIFLER</i>	
Probabilistic Fatigue and Reliability Simulation (#73)	543
<i>A. HALFPENNY, A. CHADBOD, M. BONATO</i>	
M - New Materials	553
Influence of Variable Amplitude Loading on Cyclic Material Behavior of AM Structures (#74)	555
<i>M. SCURRIA, R. WAGENER, T. MELZ</i>	

Fatigue strength values for components manufactured in the Wire Arc Additive Manufacturing process (#105) <i>M. WÄCHTER, M. LEICHER, C. LEISTNER, M. HUPKA, L. MASENDORF, K. TREUTLER, S. KAMPER, A. ESDERTS, V. WESLING, S. HARTMANN</i>	557
Energy based method for fatigue damage prediction of rubber fibre composites and the influence of different modelling techniques on the method results (#25) <i>S. OMAN, M. NAGODE, J. KLEMENC</i>	567
Behaviour of a grain refined low carbon bainitic TRIP steel under cyclic loading (#13) <i>I. BURDA, R. KOLLER, C. AFFOLTER, A. ARABI-HASHEMI, K. ZWEIACKER, L. OBERLI, H. ROELOFS</i>	577
O - Fracture Mechanics and Defects	581
Evaluation of influences of materials processing on the fatigue life of quenched and tempered SAE 4140 (#46) <i>R. ACOSTA, T. BILL, T. EYRISCH, T. HIELSCHER, M. MAGIN, P. STARKE</i>	583
Cyclic material behavior of aluminium wrought alloys (#65) <i>A. MACIOLEK, R. WAGENER, T. MELZ</i>	593
Fatigue performance and modelling of a cast aluminium alloy under variable amplitude loading (#128) <i>A. NOURIAN-AVVAL, A. FATEMI</i>	603
Probabilistic Simulation of the fatigue strength of case hardened components under special consideration of residual stresses (#144) <i>J.-A. MEIS, V. ISS, A. RAJAEI, C. BROECKMANN</i>	613
P - Overloads	623
The effect of overloads on fatigue crack propagation measured by DIC, BEMI and synchrotron (#55) <i>M. MARX, M. THIELEN, C. MOTZ</i>	625
Determining the influence of overloads on the cyclic material behaviour of nodular cast iron (#17) <i>C. BLEICHER, H. KAUFMANN, T. MELZ</i>	627
Lifetime extension due to initial quasi-static tension overloads of specimens under reversed and repeated cyclic load (#43) <i>R. SZLOSAREK, A. RUDOLPH, J. KÖCKRITZ, M. KRÖGER</i>	637
The influence of rigid obstacles on fatigue life-time of critical part of axle trailers (#112) <i>J. STEINHÜBL, M. ŠULKO</i>	647

Q - Digitization	653
Early detection of damages in aircraft structures using Machine Learning and FEM-based methods (#82) <i>A. CUGNIERE, O. TUSCH, A. MÖSENBACHER</i>	655
Digital twin as solution for time latency in connected Hardware-In-The-Loop test benches (#78) <i>R. BARTOLOZZI, E.-M. STELTER, D. NICKEL, C. SCHYR, C. SÜLTROP, R. MÖLLER</i>	665
About a material model and properties as basis for a digital twin for the fatigue approach (#67) <i>R. WAGENER, H. KAUFMANN, T. MELZ</i>	675
R - Special Loading Conditions	685
Comprehensive description and evaluation of a multi-physical testing process to simulate real conditions of batteries for electric vehicles (#79) <i>A. KARTHIKEYAN, R. ZINKE, A. SCHÖNEMANN, R. HEIM</i>	687
Relevance of strong motion of a synthesized time-history for strength and functional validation in earthquake simulation (#103) <i>F. BÖSL, A. MÖSENBACHER</i>	697
Ringling conditions, durability life and sound quality of church bells (#139) <i>A. RUPP, D. SPIESS, M. PLITZNER</i>	707
Author Index	717

Note: The Chapter Letters A-R refer to the Session Names of the Conference, the # Numbers to the Contributions as published in the Conference Programme on the Conference Website www.val4.de..
